CBC Network-as-a-Service (NaaS)

Making the Network Simple

Making the Network Simple for consistency

Today, your network supports every transaction and interaction between customers and your business, not to mention employee productivity.

Your company's profitability and continued success hinges on your network's capacity to deliver a superior digital experience to all of your end users, no matter wherever they are, from any device at any time. To stay relevant, your company needs to transform the network to empower business operations, remove the headaches of network management while leveraging enterprise-grade performance and advanced security -- all for a lower price.

In short, Making the Network Simple so your organization can respond to changing business conditions flexibly and quickly.

CBC NaaS:
Taking The 'Work' Out Of Network

In a typical corporate network, applications are hosted in data centers where the traffic is backhauled to the user via a hub-and-spoke model. Security is only applied when the network bridges to the Internet from the data center.

This approach is inefficient and expensive. Poor network access and application performance, an inferior user experience, high backhaul costs and security risks only increase the burden on IT to improve conditions. IT teams have limited network visibility causing long lead times when deploying new services and missing out on new business opportunities. With so many vendors components to monitor, service level agreements are impossible to manage.

At CBC Tech, we offer an innovative and cost-effective, Network-as-a-Service (NaaS) offering that takes the 'Work' Out Of Network complexity. We've developed a portfolio of NaaS solutions that operate on a unified network architecture to streamline network management without the need for heavy technology, hardware and skills investments.

Building a robust future Network… Today

CBC Tech goes beyond simple installation and delivering KPIs. Our NaaS solution is engineered on three fundamental building blocks; providing best-of-breed technology at every stage; aggregating the best network transport sources; and ensuring a one-stop professional service delivery via a single SLA. Together, these blocks provide our customers with a single, secure and unified, fully-fledged corporate network that is delivered 'as-a-Service'.

CBC NaaS – A Solution for Every Business

No matter where you are on your network transformation roadmap, the CBC NaaS portfolio of solutions can help accelerate your time to market while ensuring business continuity and security.

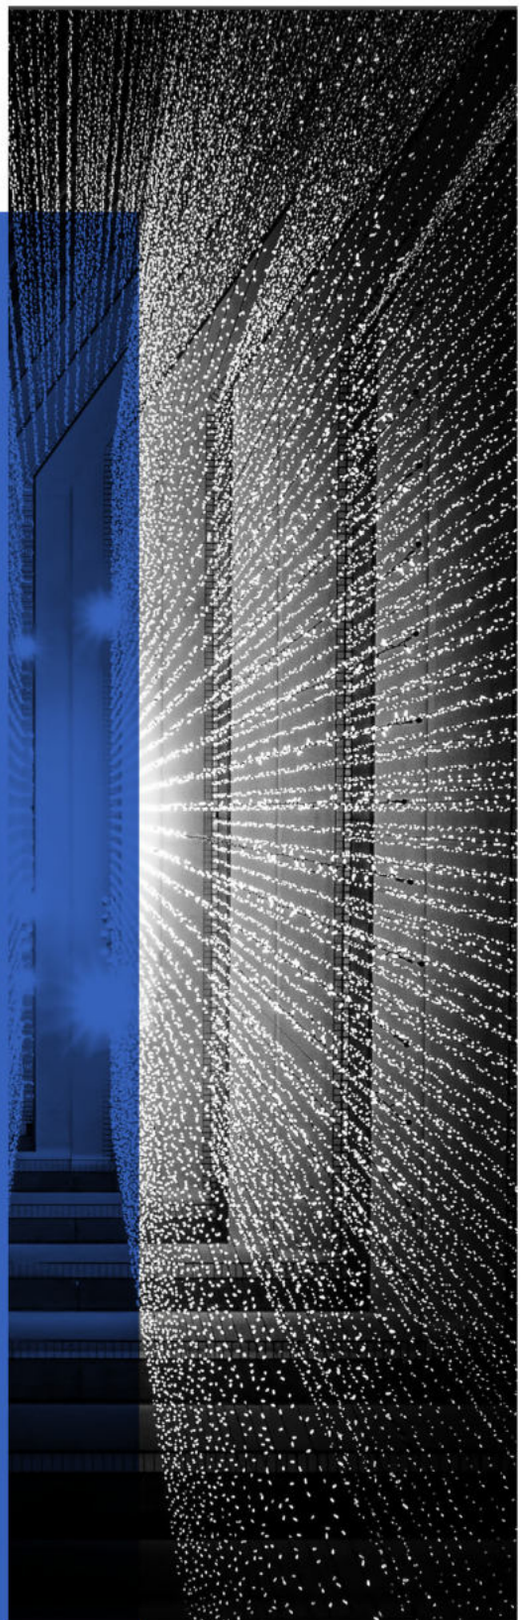
Top 5 benefits of CBC NaaS



Design approach

Our unique design methodology draws on extensive research to find a 'best-fit' technology stack to help your company achieve optimal network performance. Incorporating not only the best-of-breed in network technology and solutions, CBC NaaS includes the latest innovations in security, cloud, network consolidation and billing to resolve your pain points.

On-demand and pay-per-use

With CBC NaaS, you can align your business objectives with on-demand and flexible contracting options to scale your cloud resource requirements as they grow or shrink. There's no need to worry about contract lock-in as our complete range of value added services are offered on a monthly subscription basis via an OPEX model.

Technology protection with zero CAPEX

CBC Tech is an independent service provider with a vendor-neutral approach. Our NaaS solution delivers full control of all service components to our customers with no vendor lock-in. Experience high-quality network performance with complete protection of your technology investment with zero CAPEX.

Cost-effective network aggregation

Wherever in the world your company operates, CBC Tech will source, contract and install affordable Internet access lines, global cloud bandwidth and computing power. The combined network aggregation of all available ISPs provides the reach and capacity that exceeds the value and performance any telecom operator can provide.

End to end solution service

All CBC Tech customers can leverage our experienced team of engineers to troubleshoot all issues and seek timely resolution with 24/7 performance monitoring and safeguarding. Your company is assured continuous network availability, on-demand bandwidth, fast application response times and security for all your locations globally. We are ready to act, analyse and remediate any issues that may arise.

How we are different

CBC Tech-More than a telco service provider

Telco	**More** than telecom services, CBC Tech aggregates the best networking resources.
Technology vendor	**More** than a technology supplier, CBC Tech delivers networking services on a pay-per-use basis to suit your purpose.
System integrator	**More** than a system integrator, CBC Tech offers a one-stop Managed Service to take care of all your network elements.
Consultant	**More** than a consultant, CBC Tech goes beyond network and cost optimization to execute and deliver promised outcomes.
China	**Beyond China** CBC Tech extends a flexible cloud network fabric to deliver consistent network service globally.

In safe hands

CBC Tech uses proven methodologies and best practices derived from our experience with service providers, transforming networks for over 10 years. Our depth and breadth of experience combined with continuous investments in infrastructure, technology innovation and network architecture makes CBC NaaS unique in the market. We can make your network simpler.

>30
Solid ecosystem of Service Providers partners

>90%
Customer base constituted by Global fortune 500 companies

20+
Patents in SD-WAN and Cloud services

100M
RMB Series A Funding to accelerate R&D

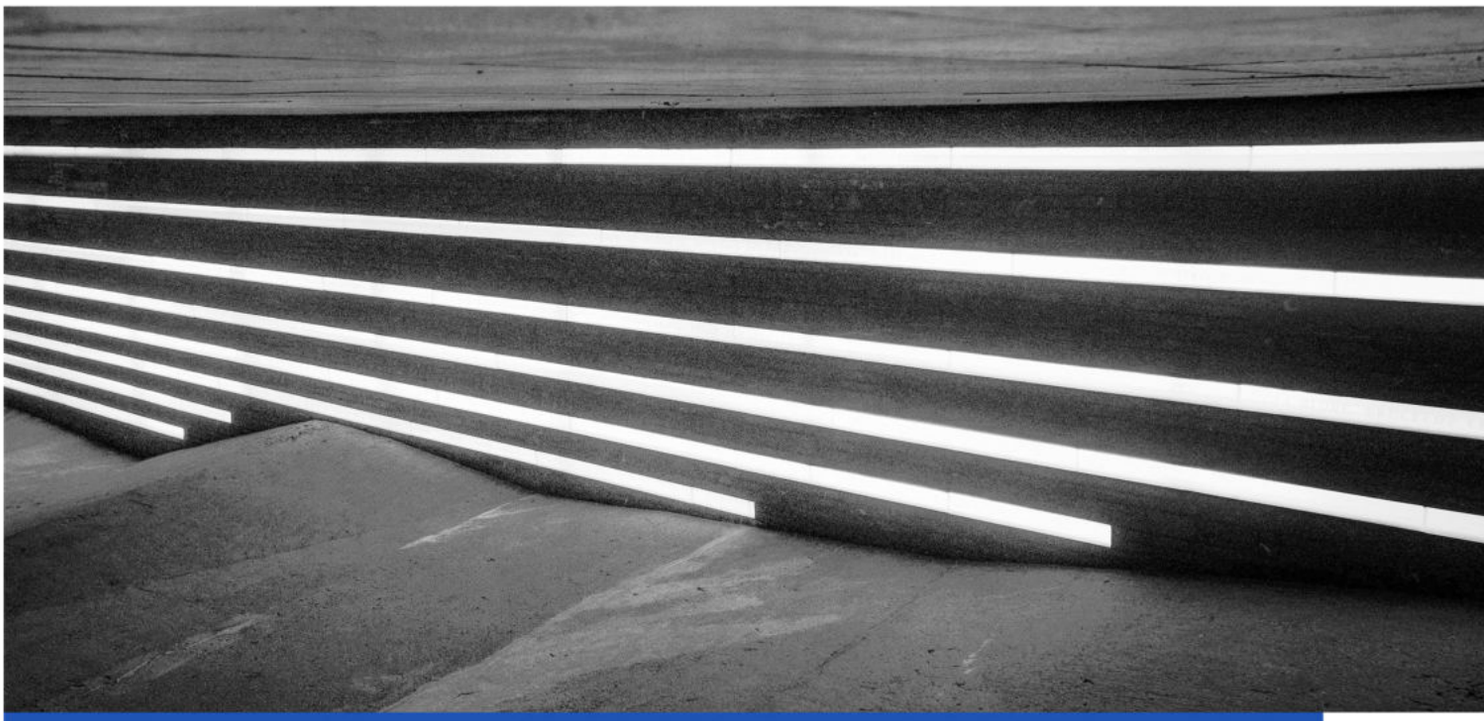
150
Public cloud locations globally, can be accessed by CBC eNet Fabric

20+
Strategic partnership with technology partners to provide Network-as-a-Service

>150
Network professionals spread across Beijing, Shanghai, Suzhou, Hong Kong and Singapore

14
Years of Service Provider and Managed Service operational experience

40+
Key business cities of IP Infrastructure coverage in China and Asia Pacific



About CBC Tech

Established in 2008, CBC Tech is the next-gen Network-as-a-Service (NaaS) provider with our own patented SD-WAN fabrics across twenty-five (25) markets in China and internationally. CBC Tech enables cloud-native network and security for enterprises over our SD-WAN fabrics, integrated with our congestion-free IP and networks, mobile access, network appliance, multi-cloud connects and cloud-based security to deliver the best application performance with excellent customer experience. With more than 20 patents, CBC Tech's R&D unit continues to develop innovative next generation networking solutions to enable enterprise networks for digital transformation.

CBC Tech is certified by TL9000, ISO9001, ISO20000 and ISO27001, to provide reliable and secure services internationally. CBC Tech has offices in Beijing (HQ), Shanghai, Suzhou, Guangzhou, Shenzhen, Hong Kong and Singapore (International HQ).
