CBC Tech

A Next Generation Network-as-a-Service (NaaS) Provider

CBC Tech is a next-gen NaaS provider, enabling SD-WAN, SASE, and cloud networks to Fortune 500 enterprises. It offers global SD-WAN fabrics across 80 cities in China and internationally. CBC Tech network infrastructure eNet fabric, underpinned by a high-performance IP backbone, ensures seamless connectivity and congestion-free access to global SaaS and public cloud services. Strengthened by a robust ecosystem of partners specializing in next-gen networking, security, and cloud, CBC Tech leverages its extensive experience and proven track record to guide large enterprises in crafting and implementing their networks in China. As a fully licensed provider, CBC Tech is committed to delivering compliant solutions for SD-WAN and SASE deployments.

30+
Solid ecosystem of service providers partners

>70%
Customer base constituted by Global fortune 2000

50+
Patents in SD-WAN and cloud services

150
Network professionals spread across globe

80+
Point of Presence (PoP) globally

30+
Strategic partnership with technology partners to provide Network-as-a-Service

300+
certificates from Zscaler and Fortinet

16
Years of service provider and managed service operational experience

80+
Key business cities of IP infrastructure coverage in China and Asia Pacific

CBC Tech:
Enabling Digital Transformation

CBC Tech has built a successful business and service model providing networking technology, services and solutions to Fortune Global 500 companies and China Enterprises, addressing their networking challenges globally.

Our depth and breadth of experience combined with continuous investments in infrastructure, technology innovation and network architecture make CBC Tech unique in the market. We can accelerate the transformation of enterprise digitalization.

No matter where you are on your network transformation roadmap, CBC Tech can help accelerate your time to market while ensuring business continuity and security.

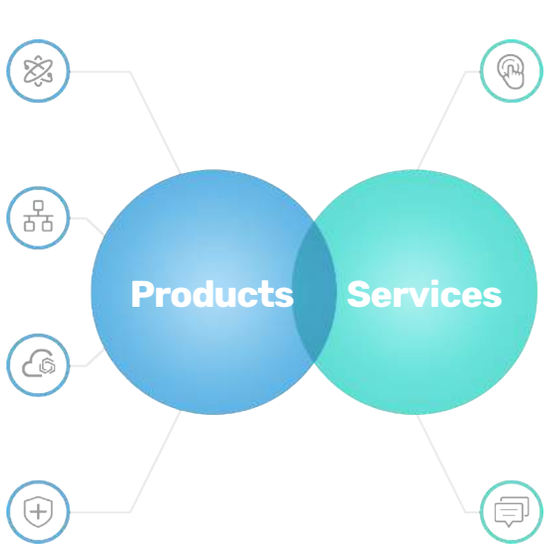
CBC Tech Product Portfolio

Network Infrastructure
PDIA | CDIA | MPLS | EPL | Hosting

Software Defined
eNet Connect | Managed SD-WAN | Smart Branch | SD-Underlay

Cloud
Cloud Connect | Multi Cloud Networking | Managed Cloud | Cost Optimization | Consolidated Billing

Security
On-premise Security | SASE
Secure Internet Assess |
Secure Remote Access |
Zero Trust Network



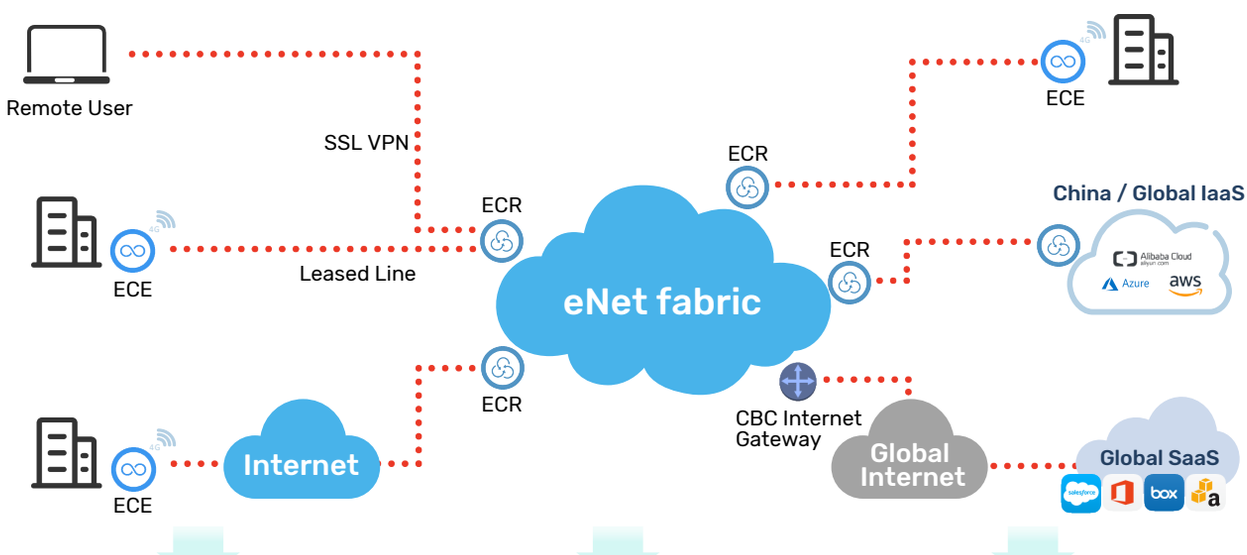
End To End Services
Day0: Service Design
Day1: Service Delivery
Day2: Service Support

Consultancy Services
Network Discovery
Network Transformation
Network & Technology Sourcing
Network/Cost Optimization
Consolidated Billing

CBC Tech Global Coverage

Covering 80+ cities around the world

CBC Tech provides a high-performance SD-WAN /SASE network on a single service level agreement powered by CBC eNet fabric. CBC Tech provides comprehensive zero-trust network access and ensures good End-to-End performance and great user experience from user to applications, including Last Mile, Middle Mile and First Mile.



Last Mile Optimisation

- Smart Path
- Default 4G/5G backup in China
- Forward error correction (FEC)

Middle Mile Optimisation

- Global eNet fabric
- Resilient and high availability
- Service level guarantee

First Mile: Optimal Peering

- Peer with China and Global tier 1 ISPs
- Connected to major clouds in China and key business cities

Enabling Enterprises to Deploy New Generation SD-WAN/SASE/Cloud Network in China

Telecom

- Network
- Operations experience
- China Expertise
- Service Provider DNA
- Congestion Free IP Backbone

+

Tech

- R&D capabilities
- Solution selling SDWAN/SASE /Cloud Skillset
- Strong partnership with Technology companies

We Are Techo

CBC Tech aggregates the best networking resources with technology and delivers networking services on a pay-per-use basis to suit customer's purpose

Professional + Managed Service + Solution

Strong team of network and managed service

professionals with technology competency (50+ patents) and own R&D center

SD-WAN/SASE Enabler in China

CBC Tech SD-WAN is differentiated with tight integration to eNet fabric and wrapped around with service support

Powerful Ecosystem

Wide ecosystem of downstream providers including ISPs, system integrators and technology vendors

Beijing | Shanghai | Suzhou | Guangzhou | Shenzhen | Hong Kong | Singapore
